Company Profile

Corporate Profile

O_2Micro® develops and markets high performance integrated circuits for power management, power saving and e-commerce applications for the computer, consumer, industrial and communications markets. Our integrated circuits use mixed signal designs, which combine analog and digital circuits within the same device. We focus our product design efforts on integrated circuits for high growth products in the computer, consumer, industrial and communications markets. Products in these markets include notebook computers, cellular phones, portable Internet appliances and liquid crystal display products. Our products enable manufacturers to build devices that run longer on battery power and are smaller, lighter or less expensive than most devices based on existing conventional designs. Our systems level expertise, proprietary design methodologies and extensive experience with power management systems for mobile computing devices allow us to develop products quickly so that our customers can achieve rapid time to market with new devices. Our products are used in electronic devices currently sold by Acer, Compaq, Dell, Ericsson, First International Computer, Fujitsu, Hewlett-Packard, Hitachi, IBM, NEC, Sharp, Siemens, Sony and Toshiba... (more)
