Company Profile

Since Xencor's founding in 1997, investors have been drawn to our remarkable scientific capabilities around monoclonal antibodies and solid intellectual property which serve as the engine behind our drug development programs. Currently, 11 candidates that have been engineered with Xencor's XmAb® technology are in clinical development by us or with partners. Xencor's internal programs include: XmAb®5871 in Phase 2 development for the treatment of IgG4-Related Disease, and also for the treatment of Systemic Lupus Erythematosus; XmAb®7195 in Phase 1a development fo...
