Company Profile

Catalyst Pharmaceuticals, Inc., is a biopharmaceutical company focused on the development and commercialization of prescription drugs targeting rare (orphan) neuromuscular and neurological diseases, including Lambert-Eaton Myasthenic Syndrome (LEMS), infantile spasms, and Tourette's disorder. Catalyst's lead candidate, amifampridine phosphate, for the treatment of LEMS has completed testing in a global, multi-center, double-blinded randomized pivotal Phase 3 trial resulting in positive top-line data. Catalyst has recently filed an NDA for this product seeking approval for its use as a treatment of LEMS and Congenital Myasthenic Syndromes (CMS). Catalyst is also developing a potentially safer and more potent vigabatrin analog (designated CPP-115 by Catalyst) to treat infantile spasms and epilepsy, as well as other neurological conditions associated with reduced GABAergic signaling, like post-traumatic stress disorder, Tourette's disorder, and movement disorders associated with the treatment of Parkinson's Disease.
