Company Profile

Founded in 1999, NewLink Genetics is an immuno-oncology company focused on discovering and developing novel products for the treatment of cancer. The drug discovery and development teams at NewLink Genetics are relentlessly pursuing a wide range of immuno-oncology portfolio candidates with the potential to change the oncology landscape. NewLink Genetics' portfolio includes two small-molecule product candidates currently in clinical development. These product candidates inhibit the IDO pathway, a key immuno-oncology target, and focus on breaking the immune system's tolerance to cancer.
