Company Profile

Vaxart is focused on developing oral recombinant protein vaccines administered using a convenient room temperature-stable tablet, rather than by injection. Vaxart's oral vaccines are designed to generate broad and durable immune responses that protect against a wide range of infectious diseases and may be useful for the treatment of chronic viral infections and cancer. The Company is developing prophylactic vaccine candidates that target a range of infectious diseases, including norovirus, a widespread cause of acute gastrointestinal distress for which two Phase 1 human studies hav...
