## Company Profile

Esperion Therapeutics is passionately committed to developing and commercializing complementary, oral therapies for patients and physicians globally that could potentially significantly reduce elevated levels of low-density lipoprotein cholesterol (LDL-C) in patients with hypercholesterolemia inadequately treated with current lipid-modifying therapies. Bempedoic acid, Esperion-discovered and developed, brings a targeted mechanism of action to the space that could potentially address unmet medical needs in a way that is "patient-friendly, physician-friendly, and payer-friendly".
