Company Profile

At Concert Pharmaceuticals, we are pioneering our industry-leading expertise in deuterium chemistry to discover and develop innovative drug products that have impact for patients and address important medical needs. Our innovative approach has already resulted in multiple drug candidates that offer improved ways to target a broad range of disease areas, including autoimmune and inflammatory diseases and central nervous system (CNS) disorders. Each of these novel candidates was designed to be improved with our deuterium chemistry, and is based on an approved drug, an advanced clinical candidate or a previously studied, biologically active compound.
